Close Diversified Income Portfolio Fund – A (Accumulation)

A sub-fund of Close Discretionary Funds unit trust (ISIN: GB00B4X21294)

This Fund is managed by Close Asset Management (UK) Limited

Objective and investment policy

Objective: To provide a regular income stream together with some capital growth over the medium term (i.e. more than 5 years).

Investment policy: The Fund will hold, directly and indirectly, at least 80% of its portfolio in a mixture of equities and fixed interest securities.

The Fund is actively managed, with the manager employing a strategic asset allocation model (developed in collaboration with an external provider) that is matched to a specific risk and volatility band. Accordingly, the allocation to particular asset classes may vary over time at the investment manager's discretion as is consistent with a conservative risk and volatility level and in response to changing market conditions. However, the allocation to equities will remain within a 20-60% range, consistent with its risk/return profile.

The Fund may invest in equities of companies from anywhere in the world, in any sector and of any market capitalisation. This may include shares in smaller companies and companies listed in emerging markets but the Fund will not hold unlisted investments.

The fixed interest component of the Fund may include government and corporate bonds (which may include emerging market and high yield bonds). These may be investment grade, sub-investment grade or unrated. Investment grade bonds for the purposes of this Fund are those which are rated at least BBB- (or equivalent) by a single rating agency at the time of purchase.

The Fund may also invest in other transferable securities (including closed ended funds and exchange traded funds), and collective investment schemes which may include schemes managed by the Manager or an affiliate of the Manager, money market instruments and deposits, cash and near cash. There may be occasions where the Manager considers that it is prudent, given market conditions, to maintain higher levels of liquidity in the Fund. In such circumstances, the Manager may hold up to 20% of the Fund in cash.

The Fund may gain exposure to alternative asset classes, such as commodities, hedge funds, infrastructure, property and convertibles through investment in transferable securities.

The Fund may use derivatives, including exchange traded and over the counter derivatives, forward transactions and currency hedges for investment purposes as well as for efficient portfolio management.

Other information:

Units can be bought, sold or switched in the Fund on any business day, as defined in the Prospectus.

An order must be received by the Administrator by 11:45am on any business day to receive that day's fund price. Please note that if an order is placed by an intermediary or Financial Adviser they may require extra processing time.

Units will be accumulation units. Income from investments held by the Fund will be invested into the value of the units.

The Fund should be regarded as a long term investment and may not be appropriate for investors who plan to withdraw their money in the short to medium term i.e. within 5 years.

Risk and reward profile

The Risk and Reward profile demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data (the past 5 years), may change over time and may not be a reliable indication of the future risk profile of the Fund.

The Fund is ranked at 4 because funds of this type have experienced average rises and falls in value in the past. Past performance is not a reliable guide to future performance. The lowest category does not mean risk free.

Investing in the Fund carries the following main risks:

Counterparty risk: Counterparty risk: The Fund could lose money if a counterparty with which it transacts becomes unwilling or unable to meet its obligations to the Fund.

Currency risk: The Fund invests in overseas assets, denominated in currencies other than Sterling. The Manager aims to remove some of the impact of changes in some exchange rates by hedging, a currency transaction which may protect against such movements. While the Fund operates portfolio hedging to reduce this risk, it may not always be fully effective.

Default risk: The Fund may invest in bonds which provide a fixed or variable return and which are a form of loan, the value of which depends on the issuer being able to make its payments. There is a risk that the issuer will fail to do so. Although the Fund generally invests in bonds with high ratings, a high rating does not guarantee an issuer's ability to pay.

Derivatives risk: The Fund uses derivatives for efficient portfolio management purposes only (currency hedging). Using derivatives can involve a higher level of risk. A small movement in the price of an underlying investment may result in disproportionately large movements in the price of the derivative instrument.

Emerging Markets risk: The Fund may invest in emerging markets which can involve a higher element of risk due to less well regulated markets and the potential for political and economic instability.

Liquidity risk: In extreme market conditions, some securities held by the fund may become hard to value or sell. In these circumstances, performance may be affected and redemptions in the fund may need to be deferred or the fund suspended for a period of time.

The full list of the Fund’s risks are contained in the “Risk Factors” section of the Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	5.00%
Exit charge	0.00%

The entry charge is the maximum that could be taken out of your money before it is invested. The charges shown are maximum figures. In some cases you may pay less. Consult your financial adviser for details.

Charges taken from the Fund over a year

Ongoing charges	1.33%
-----------------	-------

Charges taken from the Fund under certain specific conditions

Performance fee	None
-----------------	------

The figure for ongoing charges excludes portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares or units in another fund and transaction costs paid to the custodian of the Fund.

The ongoing charges are based on the Fund’s expenses for the twelve months ending 31 March 2024, this now includes the Fund Management Fee which is fixed. Ongoing charges may vary from year to year. The Closed-Ended Funds synthetic cost is 0.22%. Following the recent changes to disclosure requirements; Closed-Ended Funds are now excluded in the calculation of the synthetic element of the ongoing charge.

Further information about charges can be found in the Fees section of the Prospectus.

If you invest through a third party provider (including platforms) you are advised to consult them directly as charges, performance, and terms and conditions may differ materially to those shown in this document.
